#### Share scam warning

We are aware that a significant number of shareholders of VCTs have recently received unsolicited telephone calls from a company purporting to be acting on behalf of a client who is looking to acquire their VCT shares at an attractive price. We believe these calls to be part of a "Boiler Room Scam". Shareholders are warned to be very suspicious if they receive any similar type of telephone call.

#### **CHAIRMAN'S STATEMENT**

I am pleased to present the Half-Yearly Report for the Company for the six months ended 30 September 2022.

Perhaps unsurprisingly, the Company has experienced a modest fall in its Net Asset Value per share ("NAV") over the period, as more testing market conditions have taken hold and public market comparables, where these are used as inputs to valuations, are almost universally down in the period. The portfolio was notable for a significant exit from the legacy portfolio and also saw a number of new investments being added to the technology portfolio.

#### Net Asset Value and results

At 30 September 2022, the Company's Net Asset Value per share ("NAV") stood at 52.8p, a decrease of 4.7p or 7.8% since 31 March 2022 (after adding back the dividend paid during the period).

The loss on ordinary activities after taxation for the period was £8.9 million (period ended 30 September 2021: £17.1 million profit), comprising a revenue loss of £486,000 (period ended 30 September 2021: £63,000) and a capital loss of £8.4 million (period ended 30 September 2021: £17.2 million profit).

#### Dividend

In 2022, the interim dividend was paid at the end of January. The Board has reviewed the payment date of the interim dividend and decided to move the usual date to early April in future as this will provide the Board with some additional flexibility as to the level of dividend that can be paid.

The Board targets a total annual dividend of equal to 5% of net asset value. An interim dividend of 1.0p per Share will be paid on 7 April 2023, to Shareholders on the register at 3 March 2023. The Board expects to announce in due course a final dividend for the year ended 31 March 2023 which will be paid in August/September 2023.

Shareholders are reminded that the Company now operates a Dividend Reinvestment Scheme, which allows Shareholders to automatically reinvest their dividends into new shares in the Company and obtain further income tax relief on that investment. Further details about how to opt-in can be found in the "Shareholder Information" section on the inside cover of this report.

#### Venture capital investments

During the period, the Company made three new and two follow-on investments, at a total cost of £8.2 million.

New investments were made in Expanding Circle Limited (trading as Altruistiq), BeZero Carbon Limited and Fluidic Analytics Limited. Follow-on investments were made in Focal Point Positioning Limited, and Apperio Limited.

At the period end, the Company held a portfolio of 46 venture capital investments, valued at £71.8 million.

As usual, the Board has reviewed the valuations of the unquoted investments as at 30 September 2022 and a number of adjustments to their carrying values have been made. This has resulted in a net valuation downturn of £6.9 million for the period across the whole portfolio, primarily as a result of falls in comparable market valuations and assessment of the portfolio.

The Company holds two AIM-quoted investments; Access Intelligence plc and Fulcrum Utility Services Limited, which are both valued on their share prices as at 30 September 2022. The valuation of the investment in Access Intelligence saw a decrease of £746,000 over the period and that in Fulcrum of £26,000, driven by general market conditions.

Further details on these investments are included in the Investment Manager's Report on pages 3 and 4.

#### **CHAIRMAN'S STATEMENT (continued)**

#### **Fundraising**

As reported in the last Annual Report, the Company closed a very successful offer for subscription in April 2022, having raised £20 million.

In view of the strong demand from investors and the expectation of a continuing stream of good quality deal flow, the Company launched a new offer for subscription in October seeking to raise up to £30 million (with an overallotment facility of £10 million to be used at the Directors' discretion).

Investor interest in this offer is once again proving to be high with over £17 million having been raised at the time of writing.

Shareholders can find full details of the offer including the prospectus at:

www.moltenventures.com

Investors are recommended to consult their financial adviser before making any investment decisions.

#### Share buybacks

The Company continues to operate a policy of buying in its shares that become available in the market at approximately a 5% discount to the latest published NAV, subject to regulatory and liquidity constraints.

In line with this policy, during the period, the Company purchased 2,620,650 shares for cancellation at an average price of 54.9p per share.

Any Shareholders considering selling their shares will need to use a stockbroker, whom you should ask to contact Panmure Gordon (UK) Limited, who acts as the Company's corporate broker and can provide details on closed periods and when the Company is able to buy shares.

#### Outlook

Despite the reduced valuations of some investments, the Board remains satisfied that the Company continues to hold a well-diversified portfolio of emerging technology businesses which have the potential to deliver attractive returns to investors.

While valuations of the world's largest quoted technology businesses have fallen heavily in recent months, the transformative, venture capital backed, high growth potential technology businesses in which your Company invests operate in a different environment in terms of funding and corporate activity. fundamental drivers for innovation, for new technologies and the re-invention or creation of new markets, remain strong.

I look forward to updating Shareholders on progress in my statement in the Annual Report to 31 March 2023, which will be published in the summer.

#### **INVESTMENT MANAGER'S REPORT**

The first six months of the financial year have been against the backdrop of a challenging market environment with inflation and rising global interest rates feeding through to a decline in the value of publicly listed high growth technology companies. Nasdaq has declined 25% in the past six months while technology sub-sectors such as semiconductors and e-commerce have declined further. In the private markets deployment of investment capital has slowed while companies, and investors, adapt to an environment with a higher cost of capital.

This backdrop of heightened geopolitical risks and rising inflation follows a period where the Company registered an increase in Net Asset Value ("NAV") of 21% to the year end March 2022. Unsurprisingly given the headwinds the Company has seen a fall in its valuation in the following six-month period to 30 September 2022.

In the last six months the NAV has fallen from 60.6p to 52.8p a decrease of 7.8% after adding back the dividends paid in the period.

There were net unrealised valuation increases of £2.3m over the period; the largest being Focal Point Positioning Limited (£1.7m) on the back of a successful fundraising.

There were net unrealised valuation losses on investments of £9.3 million in the period; the largest write downs being IESO Digital Health Limited (£2.3m), Freetrade Limited (£1.8m), Primary Bid Limited (£1.8m) and Cervest Limited (£1.3m) as valuations and valuation comparables dropped in difficult market conditions.

In the period the company invested a total of £8.2 million into three new companies and two follow-on investments. Details of these are shown in the Chairmans's report. Post this period end one further new deal has been completed into Worldr (worldr.com), which provides security products for enterprise communications platforms such as Microsoft Teams.

In the period two exits have been completed; Lyalvale Express Ltd was part of the legacy portfolio prior to the co-investment agreement with Molten Ventures. The investment was an MBO made in 1998 and returned a multiple of 4.58x and an IRR of 15.9% over the investment period. The consideration was £5.9 million, having received further income and principal debt repayments of £2.8 million over the investment period. The sale allowed the payment of a special dividend of 1.6p in August 2022.

Servoca was also a legacy portfolio exit for a total consideration of £0.35 million, a small profit of 8% on cost.

Post the period end a further exit has been completed from the Molten technology portfolio; Roomex initial proceeds of £1.28 million are a 1.2x return on cost. There is a possibility of further escrow proceeds of £0.25 million.

We now define the Company as having two portfolios; a new technology portfolio invested alongside other Molten Ventures funds and a legacy portfolio assembled before the Molten Ventures plc arrangement. At the period end, the technology portfolio as a percentage of total net assets accounted for 58%, the legacy portfolio 14%, and cash 28%.

#### **INVESTMENT MANAGER'S REPORT (continued)**

As Investment Manager of the Company, we previously signalled cautious optimism as we believe the fundamentals of technology investing remain strong. We maintain the belief that investing wisely in innovation can yield good returns across the investment cycle.

The core portfolio companies are well funded and while we are not complacent about the economic headwinds, we are confident in our technology investment strategy and the attributes of strong potential for future value growth

#### 8. Reserves

The special reserve is available to the Company to enable the purchase of its own shares in the market without affecting its ability to pay dividends and allows the Company to write back realised capital losses arising on disposals and impairments.

Distributable reserves are calculated as follows:

	30 Sept 2022	30 Sept 2021	31 Mar 2022
	£'000	£'000	£'000
Special reserve	2,285	12,041	5,053
Capital reserve - realised	936	-	1,516
Revenue reserve	(1,578)	(618)	(1,092)
Merger reserve - distributable element	-	423	-
Unrealised losses - net of unquoted gains	(1,057)	6,283	1,316
	586	18,129	6,793

In October 2018, the balances on the Share Premium account and the capital redemption reserve were cancelled and added to the special reserve, contributing an additional £26.2 million to distributable reserves. The VCT regulations place some restrictions on the use of these reserves during the first three to four years after the funds on which they arose were raised.

Following the granting of shareholder approval at the Annual General Meeting in August, the Company is now commencing the process to cancel the share premium account and capital redemption reserve which will create additional distributable reserves.

#### 9. Investments

The fair value of investments is determined using the detailed accounting policy as set out in Note 1 of the Annual Report.

The Company has categorised its financial instruments using the fair value hierarchy as follows:

- Level 1 Reflects financial instruments quoted in an active market (fixed interest investments, and investments in shares quoted on either the Main or AIM Markets);
- Level 2 Reflects financial instruments that have prices that are observable either directly or indirectly; and
- Level 3 Reflects financial instruments that use valuation techniques that are not based on observable market data (unquoted equity investments and loan note investments).

	Level 1 £'000	Level 2 £'000		Sept 2022 Total £'000	Level 1 £'000	Level 2 £'000		Mar 2022 Total £'000

#### 10. Risks and uncertainties

Under the Disclosure and Transparency Directive, the Board is required in the Company's half-yearly results to report on principal risks and uncertainties facing the Company over the remainder of the financial year.

The Board has concluded that the key risks facing the Company over the remainder of the financial period are as follows:

- investment risk associated with investing in small and immature businesses;
- liquidity risk arising from investing mainly in unquoted businesses; and
- failure to maintain approval as a VCT.

In all cases the Board is satisfied with the Company's approach to these risks. As a VCT, the Company is forced to have significant exposure to relatively immature businesses. This risk is mitigated to some extent by holding a well-diversified portfolio.

With a reasonably illiquid venture capital investment portfolio, the Board ensures that it maintains an appropriate proportion of its assets in cash and liquid instruments.

The Company's compliance with the VCT regulations is continually monitored by the Administration Manager, who regularly reports to the Board on the current position. The Company also retains Philip Hare and Associates LLP to provide regular reviews and advice in this area. The Board considers that this approach reduces the risk of a breach of the VCT regulations to a minimal level.

The Company has considerable financial resources at the period end and holds a diversified portfolio of investments. As a result, the Directors believe that the Company is well placed to manage its business risks successfully despite the current uncertain economic outlook.

The Directors have concluded that the Company has adequate resources to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going concern basis of accounting in preparing the financial statements.

### **NOTES TO THE UNAUDITED FINANCIAL STATEMENTS (continued)** for the six months ended 30 September 2022

- 11. The Directors confirm that, to the best of their knowledge, the half-yearly financial statements have been prepared in accordance with the "Statement: Half-Yearly Financial Reports" issued by the UK Accounting Standards Board as well as in accordance with FRS 104 Interim Financial Reporting and the half-yearly financial report includes a fair review of the information required by:
  - (a) DTR 4.2.7R of the Disclosure and Transparency Rules, being an indication of important events that have occurred during the first six months of the current financial year and their impact on the condensed set of financial statements, and a description of the principal risks and uncertainties for the remaining six months of the year; and
  - (b) DTR 4.2.8R of the Disclosure and Transparency Rules, being related party transactions that have taken place in the first six months of the current financial year and that have materially affected the financial position or performance of the entity during that period, and any changes in the related party transactions described in the last Annual Report that could do so.
- 12. The unaudited financial statements set out herein do not constitute statutory accounts within the meaning of Section 434 of the Companies Act 2006 and have not been delivered to the Registrar of Companies. The figures for the period ended 31 March 2022 have been extracted from the financial statements for that period, which have been delivered to the Registrar of Companies; the Auditor's report on those financial statements was unqualified.
- **13.** Copies of the unaudited Half-Yearly Report will be sent to Shareholders shortly.
